Assignment No. 1: Case Study on Website Evaluation and Planning

1.Introduction

In the modern digital era, websites play a crucial role in communication, business growth, education, and service delivery. A website often acts as the first point of interaction between an organization and its users. Therefore, careful planning before coding a website is essential to ensure usability, accessibility, performance, and user satisfaction. Poor planning may result in confusing navigation, slow loading times, security issues, and an overall negative user experience.

This assignment focuses on the importance of pre-development planning through a case study approach. Before developing any client-based website, it is important to analyze existing websites, understand their strengths and weaknesses, and learn from real-world implementations. By evaluating different websites, students can identify good design practices, common mistakes, and essential features that should be included or avoided during development.

The objective of this assignment is to visit a minimum of five different websites related to various client projects, evaluate them based on specific parameters, and conclude whether they represent good or bad website design. This study helps in building a strong foundation for developing effective, user-friendly, and professional websites using web technologies.

2. Objectives of the Assignment

The main objectives of this case study are as follows:

- To understand the importance of website planning before coding.
- To analyze real-world websites from different domains.
- To identify positive and negative aspects of website design.
- To evaluate websites based on usability, design, content, and performance.
- To learn best practices and common design issues in web development.
- To apply these learnings while developing future web projects.

3.Detailed Website Analysis

Case Study of Website 1
YouTube

1. Website Information
Website URL: https://www.youtube.com/
Category: Entertainment / Education / Video-Sharing Platform
Target Users: General public, students, content creators, educators, businesses

2. Purpose of the Website
The main purpose of **YouTube** is to allow users to **watch, upload, share, and interact with videos**. It serves as a global platform for **entertainment, education, news, tutorials, marketing, and content creation**, enabling creators to reach a worldwide audience.

3. Description of the Website
Overview
YouTube is the world's largest **video-sharing and streaming platform**. Users can consume content such as music videos, educational lectures, tutorials, vlogs, movies, live streams, podcasts, and short videos (YouTube Shorts). It also provides monetization opportunities for creators through ads, memberships, and sponsorships.
The platform supports **personalized recommendations**, subscriptions, comments, likes, playlists, and live streaming, making it highly interactive and engaging.

Likes
- Huge variety of content (education, entertainment, tutorials, news)
- Free access to most videos
- Personalized recommendations using AI
- Supports creators through monetization
- Available on web, mobile, smart TVs, and tablets

Dislikes
- Excessive advertisements for free users
- Possibility of distracting or misleading content
- Algorithm can promote time-consuming usage
- Some content quality issues

Findings
- YouTube is widely used as a **learning platform** along with entertainment
- Strong creator economy ecosystem
- AI-based recommendation system increases engagement
- One of the most visited websites globally

Technology Used
- HTML, CSS, JavaScript
- Video streaming and compression technology

- AI / Machine Learning algorithms for recommendations
- Cloud storage and content delivery networks (CDN)

Owner of the Website

- **Owner:** Google LLC
- **Parent Company:** Alphabet Inc.

Background of the Owner

YouTube was founded in **2005** and later acquired by **Google in 2006**. Google expanded YouTube into a global video platform using advanced cloud infrastructure, AI technologies, and advertising systems.

Issues in the Website

- High data consumption
- Content moderation challenges
- Addiction and screen-time concerns
- Ads interrupt user experience

Facts

- One of the **most visited websites in the world**
- Billions of users globally
- Used for education, marketing, entertainment, and news
- Supports multiple languages and regions

4. Summary Table

Parameter	Details
Website Name	YouTube
URL	https://www.youtube.com/
Category	Entertainment / Video Platform
Purpose	Video sharing, streaming & learning
Target Users	General users & creators
Design Style	Media-rich, interactive
Technology	Streaming, AI algorithms, cloud
Strengths	Massive content, free access
Weaknesses	Ads, distraction risk
Overall Evaluation	**Good**

Overall Evaluation

YouTube is a powerful and versatile platform that successfully combines entertainment, education, and content creation. Despite issues like ads and content moderation, it remains one of the **most impactful and widely used websites globally**.

Case Study of Website 2

Yahoo

1. Website Information

Website URL: https://www.yahoo.com/

Category: Web Portal / News / Email / Entertainment

Target Users: General public, professionals, news readers, email users

2. Purpose of the Website

The main purpose of **Yahoo** is to act as a **web portal** that provides access to **news, email services, finance, sports, entertainment, search, and lifestyle content** from a single platform. It aims to keep users informed and connected with daily digital services.

3. Description of the Website

Overview

Yahoo is one of the **oldest and most well-known internet portals**. It offers a combination of services such as **Yahoo Mail, Yahoo News, Yahoo Finance, Yahoo Sports, and Entertainment content**. The website aggregates news from multiple sources and presents it in a user-friendly format.

Yahoo focuses on **information delivery and communication services**, rather than specialized tools. It is widely used for email services and financial news.

Likes

- All-in-one portal for news, email, finance, and sports
- Clean and readable content layout
- Yahoo Mail is reliable and widely used
- Yahoo Finance provides detailed market data
- Easy navigation between sections

Dislikes

- Homepage feels content-heavy
- Too many ads and sponsored content
- Less innovative compared to newer platforms
- Declining popularity among younger users

Findings

- Yahoo is more focused on **content aggregation** than original content
- Strong presence in **finance and email services**
- Still trusted for news and stock market information
- Competes with Google and Microsoft portals

Technology Used

- HTML, CSS, JavaScript
- Content aggregation algorithms
- Cloud-based email infrastructure
- Advertisement and analytics systems

Owner of the Website

- **Owner:** Yahoo Inc.
- **Parent Company:** Apollo Global Management (via Yahoo brand acquisition)

Background of the Owner

Yahoo was founded in **1994** and became one of the **pioneers of the internet era**. Though it lost dominance to Google over time, Yahoo continues to operate as a **media and technology brand**, focusing on content, email, and finance services.

Issues in the Website

- Heavy advertising affects user experience
- Homepage can feel cluttered
- Slower innovation compared to competitors
- Limited personalization compared to modern platforms

Facts

- Yahoo Mail is still used by millions globally
- Yahoo Finance is one of the most visited finance websites
- Operates in multiple countries and languages
- One of the earliest internet companies

4. Summary Table

Parameter	**Details**
Website Name	Yahoo
URL	https://www.yahoo.com/
Category	Web Portal / News
Purpose	News, Email, Finance & Information
Target Users	General users
Design Style	Content-heavy portal
Technology	Web services, email systems
Strengths	Finance & Mail services
Weaknesses	Ads, cluttered homepage
Overall Evaluation	**Good**

Overall Evaluation

Yahoo remains a useful web portal for users who want quick access to news, finance updates, and email services. Although it is no longer a market leader, it still delivers value through reliable information and communication tools.

Case Study of Website 3
Tata Consultancy Services (TCS)

1. Website Information
Website URL: https://www.tcs.com/
Category: Corporate / Information Technology Services
Target Users: Clients, enterprises, job seekers, investors, professionals, students

2. Purpose of the Website
The main purpose of the **TCS website** is to represent the company's **IT services, consulting solutions, innovations, career opportunities, and corporate information**. It serves as a digital platform for business clients, potential employees, investors, and partners to understand TCS offerings and global presence.

3. Description of the Website
Overview
Tata Consultancy Services (TCS) is a global IT services, consulting, and business solutions company. The website provides detailed information about **industries served, services offered, digital solutions, research & innovation, sustainability initiatives, and career opportunities**.
The website reflects a **professional, corporate, and enterprise-focused design**, emphasizing trust, scale, and innovation.

Likes
- Highly professional and corporate design
- Clear information about services and industries
- Strong career section for students and professionals
- Showcases innovation, research, and sustainability
- Well-structured navigation

Dislikes
- Content-heavy pages can be overwhelming
- Not beginner-friendly for non-technical users
- Too much corporate terminology
- Some pages load slowly due to rich media

Findings
- Website is more **business-oriented** than user-oriented
- Strong emphasis on digital transformation and innovation
- Designed mainly for enterprises and job seekers
- Reflects brand credibility and global presence

Technology Used
- HTML, CSS, JavaScript
- Enterprise-level web frameworks
- Cloud infrastructure

- Analytics and content management systems (CMS)

Owner of the Website

- **Owner:** Tata Consultancy Services (TCS)
- **Parent Company:** Tata Group

Background of the Owner

TCS was founded in **1968** and is part of the **Tata Group**, one of India's largest and most trusted conglomerates. TCS is a global leader in IT services with operations in over 50 countries and serves clients across multiple industries.

Issues in the Website

- Overloaded content may confuse first-time visitors
- Limited personalization
- Complex navigation for casual users
- Minimal interactive elements

Facts

- One of the **largest IT companies in the world**
- India's largest IT services exporter
- Employs hundreds of thousands of professionals globally
- Trusted by major global enterprises

4. Summary Table

Parameter	Details
Website Name	Tata Consultancy Services (TCS)
URL	https://www.tcs.com/
Category	Corporate / IT Services
Purpose	Business services, careers & information
Target Users	Enterprises, job seekers
Design Style	Professional, corporate
Technology	Enterprise web systems
Strengths	Brand trust, detailed content
Weaknesses	Content-heavy, complex
Overall Evaluation	**Good**

Overall Evaluation

The TCS website successfully represents a global IT enterprise by showcasing its services, innovation, and credibility. While it may feel complex for casual users, it is highly effective for **business clients, professionals, and job seekers**, making it a strong corporate website.

Case Study of Website 4

Wipro

1. Website Information
Website URL: https://www.wipro.com/
Category: Corporate / Information Technology & Consulting
Target Users: Business clients, enterprises, job seekers, investors, professionals, students

2. Purpose of the Website
The main purpose of the **Wipro website** is to present the company's **IT services, consulting solutions, digital transformation offerings, career opportunities, and corporate information**. It acts as an official platform for clients, employees, investors, and partners to understand Wipro's capabilities and global operations.

3. Description of the Website
Overview
Wipro is a multinational IT services and consulting company. The website highlights **technology solutions, industry expertise, sustainability initiatives, innovation labs, and career paths**. It is designed with a **professional and enterprise-focused layout**, emphasizing credibility, innovation, and large-scale business solutions.
The content is structured to address different stakeholders such as clients, job seekers, and investors.

Likes
- Clean and professional corporate design
- Clear presentation of services and industries
- Strong careers and campus hiring section
- Focus on sustainability and innovation
- Well-organized navigation menus

Dislikes
- Content-heavy pages may feel overwhelming
- Less engaging for non-technical users
- Minimal interactive elements
- Some sections require multiple clicks to reach

Findings
- Website is mainly **enterprise and client-focused**
- Emphasizes digital transformation, cloud, AI, and consulting
- Designed more for information delivery than interaction
- Reflects a strong global corporate brand

Technology Used
- HTML, CSS, JavaScript
- Enterprise-level content management system (CMS)

- Cloud infrastructure and analytics tools
- Secure web hosting and optimization technologies

Owner of the Website

- **Owner:** Wipro Limited

Background of the Owner

Wipro was founded in **1945** and has evolved into one of India's leading **global IT services and consulting companies**. It operates in many countries and serves clients across diverse industries including banking, healthcare, manufacturing, and technology.

Issues in the Website

- Too much corporate information for first-time visitors
- Limited personalization features
- Navigation can feel complex for casual users
- Heavy content may affect page load times

Facts

- One of the **top IT services companies in India**
- Operates globally with clients in multiple industries
- Strong focus on sustainability and ethical practices
- Major recruiter of engineering graduates

4. Summary Table (Short)

Parameter	Details
Website Name	Wipro
URL	https://www.wipro.com/
Category	Corporate / IT Services
Purpose	Business services, consulting & careers
Target Users	Enterprises, professionals, job seekers
Design Style	Professional, corporate
Technology	Enterprise web systems
Strengths	Clear services, strong brand
Weaknesses	Content-heavy, less interactive
Overall Evaluation	**Good**

Overall Evaluation

The Wipro website effectively represents a global IT and consulting enterprise. It clearly communicates services, innovation, and career opportunities. Although it may feel complex for general users, it serves its intended audience—**business clients and professionals—very well**, making it a solid corporate website.

Case Study of Website 5
Cognizant

1. Website Information
Website URL: https://www.cognizant.com/
Category: Corporate / Information Technology & Consulting
Target Users: Business clients, enterprises, job seekers, professionals, students, investors

2. Purpose of the Website
The main purpose of the **Cognizant website** is to showcase the company's **IT services, digital transformation solutions, consulting capabilities, innovation initiatives, and career opportunities**. It acts as an official platform for clients, partners, employees, and job aspirants to understand Cognizant's global services and expertise.

3. Description of the Website
Overview
Cognizant is a multinational IT services and consulting company. The website provides detailed information about **industries served, digital solutions, cloud services, AI, data analytics, and enterprise transformation**. It also highlights **career opportunities, research insights, and thought leadership content**. The design reflects a **modern, professional, and enterprise-focused approach**, aligning with Cognizant's global brand image.

Likes
- Modern and professional corporate design
- Clear categorization of services and industries
- Strong career and campus recruitment section
- Focus on digital transformation, AI, and cloud
- Well-structured navigation and layout

Dislikes
- Content-heavy pages may overwhelm first-time users
- Limited interactivity for general users
- Corporate terminology may be difficult for beginners
- Some pages take time to load due to rich media

Findings
- Website is **enterprise and client-centric**
- Strong emphasis on innovation and digital solutions
- Designed mainly for business clients and professionals
- Reflects global presence and corporate credibility

Technology Used
- HTML, CSS, JavaScript
- Enterprise-grade Content Management System (CMS)

- Cloud infrastructure and analytics tools
- Secure hosting and performance optimization technologies

Owner of the Website

- **Owner:** Cognizant Technology Solutions Corporation

Background of the Owner

Cognizant was founded in **1994** and is headquartered in the United States. It is one of the world's leading **IT services and consulting companies**, serving clients across healthcare, banking, retail, manufacturing, and technology sectors, with a strong presence in India.

Issues in the Website

- Overloaded information can reduce usability for casual visitors
- Minimal personalization features
- Navigation depth can be complex
- Less engaging for non-technical audiences

Facts

- One of the **largest global IT services companies**
- Employs hundreds of thousands of professionals worldwide
- Strong presence in digital, cloud, AI, and consulting services
- Major recruiter of engineering graduates

4. Summary Table (Short)

Parameter	**Details**
Website Name	Cognizant
URL	https://www.cognizant.com/
Category	Corporate / IT Services
Purpose	IT services, consulting & careers
Target Users	Enterprises, professionals, job seekers
Design Style	Modern, corporate
Technology	Enterprise web systems
Strengths	Digital focus, strong brand
Weaknesses	Content-heavy, complex navigation
Overall Evaluation	**Good**

Overall Evaluation

The Cognizant website effectively communicates the company's global IT and consulting capabilities. While it may feel complex for casual users, it serves its intended audience—**enterprises, professionals, and job seekers—very efficiently**, making it a strong and reliable corporate website.

Final Conclusion

All five websites effectively serve their respective domains, including **entertainment, information services, and corporate IT solutions**. While corporate websites focus more on information and credibility, platforms like YouTube and Yahoo emphasize engagement and accessibility. Despite minor usability and content overload issues, **all websites successfully achieve their intended purpose**, resulting in an overall evaluation of **Good**.

Sr. No.	Website URL	Purpose of Website	Things Liked in the Website	Things Disliked in the Website	Overall Evaluation
1	https://www.youtube.com/	Video sharing, streaming, education & entertainment	Huge content variety, free access, personalized recommendations, global reach	Too many ads, distracting content, high data usage	Good
2	https://www.yahoo.com/	Web portal for news, email, finance & information	All-in-one services, reliable mail, strong finance section	Content-heavy homepage, many ads, less innovation	Good
3	https://www.tcs.com/	Provide IT services, consulting & career information	Professional design, detailed service info, strong brand trust	Content-heavy, complex for casual users	Good
4	https://www.wipro.com/	IT services, consulting, digital transformation & careers	Clean corporate design, strong careers section, sustainability focus	Less interactive, information overload	Good
5	https://www.cognizant.com/	IT services, digital solutions, consulting & recruitment	Modern design, digital focus, clear service categorization	Heavy content, complex navigation	Good
